Yes, very worthwhile. The use of mathematics  
in tangible art is very cool. We should have  
more of these in the Atrium.

10/10 would recommend.

The material was absolutely mind-blowing. There wasn't a dull moment at this event.

The only thing I'd change would be the pace of the ~~workshop~~ workshop/presentation of geometry in Islam. The material was interesting, but it could have been presented in half the time - and the other half filled with material that wasn't covered due to the time constraint (of which - having seen the Alhambra myself - I'm sure there's much, much more of).

The festival was extremely worthwhile and educational. You had a nice mix of lecture & hands-on workshops.

My only suggestion would be that you may want to think of ways to further break down some of the technical terms for people who are unfamiliar.
